PROBLEM STATEMENT

QUESTION	DESCRIPTION
Who does the problem affect	People who can't keep track of their expenses.
What is the issue	They do miscellaneous purchase and forget about it.
When does the issue occur	They don't keep track of daily expenses.
Where is the issue occurring	Due to increase in lot of payment methods like UPI, bank transfer , Cash, etc.
Why it is important that we fix theproblem	These small expenses daily add together as a huge amount and the person cannot track how he spent his money or on what he spent.

Normally, human beings forgot about the small expenses they do daily and lose the track on how much they spend and how they spend.

So, the proposed expense tracker application ensure that the expenses are date wise and category wise. This app will also provides monthly, daily and annual expense graph on amount spent.

The user can also set an alert, which they receive in their respective Gmail, when the expense exceeds the set limit by the user.
